

LED Light Sheet

Rear illumination is a fantastic way to transform glass and stone for a variety of settings, but why stop there? Combining Colorco mosaics and LED panels elevates traditional mosaics and contemporary jet cut mosaics to a whole new dimension. Versatile feature walls allow clients to transform spaces for day or night use and can be dimmed to accommodate the user's preference.

Colorco mosaics can be mortared directly to the LED panels allowing for a durable lit mosaic. Mosaics can also be mortared to thin acrylic sheets, allowing for easy removal and replacement.

Mosaic materials are not limited to glass, stone and ceramic. Let your imagination run wild and be sure to experiment with geodes, wood veneer, and other materials from your library!

Sizing:

2.5"x6" up to 48"x96"

- boards can be custom cut to almost any shape

4mm, 6mm and 8mm thicknesses are available.

Technical Information:

Color temperatures: available: Warm (3700K), Daylight (5300K), Cool (9500K)
